Re: SNRE Mini-grants Program

Earlier this spring we released the request for both seed grant proposals and new faculty grant proposals within the SNRE mini-grants program. This early start provides adequate time for the proposals to be written, evaluated and selected for funding at the beginning of the new fiscal year. On Monday, May 5, 2008, SNRE was informed that due to the UF budget cuts no funds would be available for FY 08-09 for this program. The SNRE mini-grants request for proposals is cancelled. We will update the SNRE website to indicate this change as soon as we can.

Thank you for your past participation in the program and I hope that the proposal preparation time you have invested to date will be helpful as you approach other funding opportunities.
